

INTRODUCING BOTOX® INJECTIONS

FOR PAIN AND AESTHETIC TREATMENT

WHAT IS BOTOX®?

- BOTOX® IS AN **FDA APPROVED** PURIFIED PROTEIN. IT IS USED TO REDUCE OR ELIMINATE **FACIAL WRINKLES, FACIAL AND JAW PAIN, GUMMY SMILE, AND CHRONIC MIGRAINES** CAUSED BY MUSCLES IN THE HEAD AND NECK.
- TREATMENT USUALLY ONLY TAKES A **FEW MINUTES**, AND PATIENTS BEGIN TO SEE RESULTS WITHIN **2- 14 DAYS**. EFFECTS LAST FOR APPROXIMATELY **3 - 4 MONTHS**.

BOTOX® FOR PAIN

- **TEMPOROMANDIBULAR JOINT DISORDER**, ALSO KNOWN AS **TMJ** OR **TMD**, IS PAIN CAUSED BY TEETH GRINDING, CLENCHING, FINGERNAIL BITING, OR STRESS LEADING TO ENLARGEMENT AND TENSION OF THE HEAD AND NECK MUSCLES

- BOTOX® IS INJECTED INTO HEAD AND NECK MUSCLES. IT BLOCKS NERVE SIGNALS TO THE MUSCLES, RESULTING IN MUSCLE RELAXATION AND REDUCING FACIAL PAIN
- AFTER 2-3 TREATMENTS MANY PATIENTS LOSE THE HABIT WHICH ACCOMPANIES THE CLENCHING AND GRINDING
- PATIENTS CAN ALSO NOTICE FACIAL ESTHETICS IMPROVING. FACIAL WRINKLES MAY DISAPPEAR AND FACIAL CONTOURS COULD APPEAR SLIMMER

BOTOX® FOR ESTHETICS

FACIAL AREAS THAT WE TREAT:

- **FOREHEAD WRINKLES**
- **CROW'S FEET** (WRINKLES AROUND EYES)
- **FROWN LINES** ("1 1" BETWEEN EYEBROWS)
- **RADIAL LIP LINES**
- **GUMMY SMILE**
- **"BUNNY LINES" ON THE NOSE**
- BOTOX® RELAXES FACIAL MUSCLES TO REDUCE AND ELIMINATE **FINE LINES AND WRINKLES**. WITHIN **2- 14 DAYS** FACIAL MUSCLES BECOME TEMPORARILY RELAXED, CAUSING THE OVERLYING SKIN TO LAY FLAT AND APPEAR SMOOTH
- THE UNTREATED FACIAL MUSCLES CONTRACT IN A NORMAL FASHION ALLOWING **FACIAL EXPRESSIONS TO BE UNAFFECTED.**
